

ACOUSTIC SEALANT - For Sealing Between Floorboards and Perimeters

Key Benefits

- Acoustic grade sealant
- Paintable with emulsion
- 4 hour fire rating
- Designed to acoustically seal gaps and joints

Description

Our white Acoustic Sealant is a one-part Fire Retardant Water-based Acrylic Sealant. It exhibits good adhesion to a wide variety of common building substrates without the need for a primer. Paintable with emulsion paints three hours after application. Allow 12 hours before over painting with gloss paints.

When subject to flame our sealant will intumesce (expand and char), thus blocking the passage of fire and smoke.

Recommended for perimeter sealing floors and between all floorboard joints before installing our flooring products. This seal makes the floor more airtight thus contributing to the effectiveness of any sound insulation.

This sealant can also be used in other general purpose applications.

It is not recommended for use in external situations

We advise using our Click 'N' Seal Sealant Cartridge Holder.

Click 'n' Seal is the sealant gun which is set to revolutionise the sealant gun market. With its unique patented method of holding the cartridge.

To use it you just have to push the cartridge into the gun and apply the sealant. The simple design also allows quick cartridge change and easy rotation at corners. The Click 'n' Seal gun also means no more difficulties getting into those hard to reach places, behind taps etc, with no obstruction at the nozzle end Click 'n' Seal is the easier way to seal.

The Click 'n' Seal gun can hold 310ml and 400ml cartridges, as well as 290ml thick wall cartridges.
